01 PROFILE

Hello! My name is Ian and I enjoy creating things that live on the internet. My interest in web development started back in 2018 when I decided to try learning about HTML & CSS turns out hacking together a custom reblog button taught me a lot about HTML & CSS! Fast-forward to today, and I've had the privilege of working at an advertising agency, a start-up. My main focus these days is building accessible, inclusive products and digital experiences at Nusantech I create Youtube content with my friends about teaching Japanese to people who want to learn Japanese without spending money by looking at my content. for a variety of clients.
